

The Eye Bank Association of America (EBAA) and Digi-Trax have jointly developed an easy to use standalone labeling system that includes everything you need to create and print **ISBT 128 compliant** labels. With a starter kit that includes the CorneaTrax™ software, desktop printer, labels and maintenance support, it's an easy way to incorporate an ISBT 128 labeling system in your eye bank.

The Software

Our user-friendly software provides a way for you to label your products while ensuring your eye bank is ISBT 128 compliant. The software allows for quick creation of labels as well as a robust reporting feature to review print jobs.

The Hardware

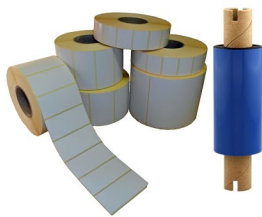

The system includes a high performance desktop printer that is designed to work with your software and labels. Its sleek and compact design is ideal for tight spaces. Also included is a high performance, 1D/2D barcode scanner designed to scan any barcode you might encounter.

High performance desktop printer

1D/2D barcode scanner

The Supplies

As a one source stop, you can purchase the labels and ribbons through Digi-Trax. Your first order includes everything you need to get started. Digi-Trax® synthetic labels conform to FDA CFR 21, Sec.

175.105, are very durable and perform under harsh conditions.

The Support

You'll receive comprehensive technical hardware support if needed as well as yearly annual software support from Digi-Trax to ensure a smooth operation.
